

# LITE PAPER

RIGVID

# 1. Introduction

## I am Rigvid

**RIGVID** is the nickname of an experienced investor and software developer, particularly known for his journey in cryptocurrency investment since 2017, during the rise and peak phase of Ethereum. With years of navigating the ups and downs of cryptocurrency, Rigvid has engaged in farming, mining, staking, and eventually focused on Masternodes and PoS (Proof of Stake) coins.

Having witnessed the hype, hacks, and closures of exchanges like Cryptopia, Crex, Altilly, Graviex, and even the decline of Birake, Rigvid has faced both significant gains and losses—notably during the Decenomy era. Despite these challenges, his investments in cryptocurrency have yielded a gross profit of over \$1,000,000.

## 2 What Does Rigvid Offer

Leveraging his experience and proven track record, Rigvid introduces an innovative project to deliver returns for all Rigvid masternode holders.

This initiative stems from a personal aspiration: to establish a self-branded coin and share its benefits with other investors.

By offering an annual return of at least 7%, this project provides a fair and sustainable yield. Any promise exceeding this rate often risks being a scam.

Offering a return higher than 7% could be considered unrealistic and unsustainable based on my analysis and extensive investment experience.

This figure has been carefully determined to ensure fairness and long-term viability.

The 7% return is not arbitrary but reflects a well-founded decision grounded in rigorous evaluation of investment opportunities and market conditions.

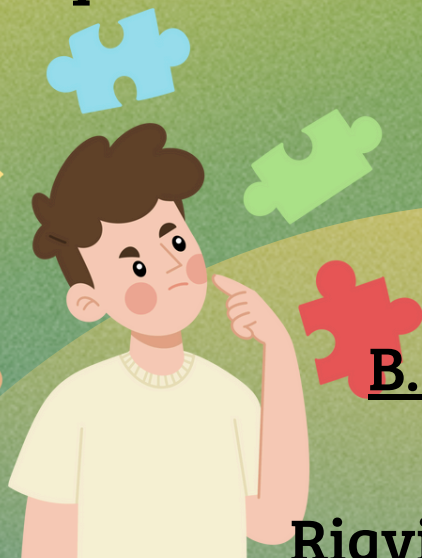

# 3. Profit Sharing and Investment Allocation

## A. Comparative Returns

- **Deposits:** Bank deposits offer fixed returns ranging from 5% to 6% annually, depending on the amount, bank policies, and term length.
- **Bonds:** Bonds provide higher returns of 5% to 12%, given their lower tax rates compared to deposits. However, they carry greater risk and require careful analysis of the issuer's credibility.

## B. Rigvid as an Investment Instrument

Rigvid offers a concept akin to bonds and deposits but within the cryptocurrency space. The project ensures a minimum annual return of 7%, with profits distributed monthly and accompanied by transparent reports.

# Investment Allocation

Proceeds from coin sales, after deducting operational costs, will be allocated to the following sectors:

**1. Lending Services: Providing loans to generate steady returns.** Rigvid offers loan services with secured collateral. With a focus on transparency and reliability, we accept a range of collateral types, such as real estate, vehicles, and other valuable assets, to ensure secure and efficient transactions.

**2. Stock Investments: Focused on dividend-hunting rather than trading.** Rigvid is a value investor in stock market, focuses on identifying undervalued assets and holding them over time to benefit from their growth and income, such as dividends.

# Investment Allocation

Proceeds from coin sales, after deducting operational costs, will be allocated to the following sectors:

**3. IT Businesses:** Investing in ISPs and web hosting services. Rigvid is dedicated to driving technological growth by investing in IT businesses and projects. One of key focus areas is supporting small to medium-sized Internet Service Provider (ISP) companies that cater to home users and personal customers.

**4. Software Development:** Building tools, mobile apps, wallets, and more to strengthen the Rigvid ecosystem. Rigvid specializes in software development, focusing on creating innovative solutions across various domains, including Software as a Service (SaaS), blockchain-related tools, backend processing systems, and mobile applications.

# VIP Member Portal

Rigvid will launch a portal featuring a VIP Dashboard accessible exclusively to VIP members. Eligibility criteria for VIP membership include holding at least one Rigvid masternode.

VIP members are entitled to monthly dividends provided they meet the following conditions:

- The Rigvid masternode (RIV) is "enabled" on the cumdate.
- The masternode has received at least one reward.
- The masternode's active time exceeds seven days.

A robust system will automatically track and verify eligible nodes/addresses, ensuring accurate dividend distribution.

## 4. Business Model

# Launch Incentive

To celebrate the launch of the project and welcome the new year, a total dividend of **\$500** will be distributed among the first VIP members of Rigvid in January

**2025**

## 5. Coin Info

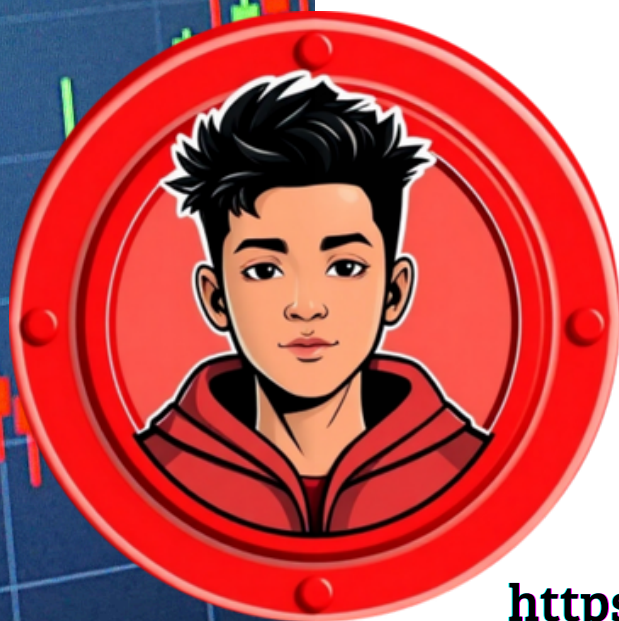

- Name : Rigvid
- Ticker : RIV
- Block Time : 60 second
- Premine : 300,000
- Max. Supply : 21,000,000
- Staking age : 600
- Maturity : 50 Confirmations
- P2P Port : 3355
- RPC Port : 3354
  
- Website : <https://rigvid.vip/>
- Twitter : [https://x.com/rigvid\\_vip%7C](https://x.com/rigvid_vip%7C)
- Explorer : <https://explorer.rigvid.vip/>
- Github : <https://github.com/rigvid-dev/rigvid>

## 6. Conclusion

Rigvid offers a secure, transparent, and fair investment platform rooted in the experience of a seasoned investor. With a minimum annual return of 7%, this project provides sustainable opportunities for investors while expanding the Rigvid ecosystem.
